Dr. Remedy's Self Defense... against the chemicals found in traditional nail polishes. This healthy, Doctor-formulated alternative to traditional nail polishes is enriched with unique, naturally-occurring elements like tea-tree oil, garlic bulb extract, wheat protein and vitamins C & E. These ingredients strengthen and protect your nails against fungus, discoloration, cracking and brittleness. It is the first and only nail polish to receive APMA's Seal of Approval. 20% off your in office purchase when you mention this newsletter. You can view their Collection Guide and Product line at <http://store.remedynails.com/> and/or at our office.

Problem of the Month

Onychomycosis is a common fungal infection of the nail plate and nail bed that affects up to 14% of the population and can have a substantial impact on the quality of life of those affected. Many people who suffer from diseases and changes of the toenails are embarrassed by its unattractive appearance. Most people will try to cover it up with polish or hide it in their shoes, but we suggest helping them not hiding them. Our office has incorporated different products to help you with this condition. These products (listed below) can be used in combination with each other with no harm or down time to you. The newest product being the KERYflex Nail Restoration system gives you an instantly beautiful nail. Check it out here <http://keryflex.com/videos/>

HEALTHY NAILS

KERYFLEX NAIL RESTORATION SYSTEM

COOLBREEZE LASER TREATMENT

FFNctf PRESCRIPTION STRENGTH TOPICAL

THERANAIL-TF HEALTHY NAIL TABLETS

COOLBREEZE

Are your toenails yellow, brittle or thickened? Than perhaps you suffer from toenail fungus, also known as onychomycosis. This condition is usually caused by heavy perspiration, poor shoe/sock ventilation, or bare feet coming in contact with damp areas such as in the gym or locker room. Today, lasers are the latest treatment for toenail fungus. The CoolTouch CoolBreeze laser can help rid your toenails of unsightly toenail fungus in as little as 3 quick treatments, depending on the severity of the condition. It is a safe & effective alternative to prescription medications and virtually painless with no required downtime. To view a video demonstration click on this link http://www.youtube.com/watch?v=_NHs1J-ECMc&feature=player_embedded. If this sounds like you, schedule your FREE consultation Today!

DON'T HIDE THEM... HELP THEM!!!

BEAUTIFUL NAILS

Summer is our longest season here in Florida and it's all about the "Bare Essentials", and that includes your toenails. Do you want to hide your toes while soaking up the sun?? *I don't think so!* Just by incorporating some simple preventative measures such as avoiding high moisture environments that breed fungus such as heavy perspiration and poor ventilation and not exposing your feet to known infected environments such as gyms ,locker rooms, and even salons that don't properly sterilize. And if you're 1 of the millions that are already infected then you should check out the easy, non-invasive products that we have right in our office to help rid you of this condition and get you ready to "bare all".
